PERSONAL SUMMARY

An enthusiastic web developer with a proven track record of creating web applications using JavaScript, React, React Native, Typescript, Node.js, HTML5, CSS3, and MUI. As a detail-oriented team player who thrives in fast-paced environments, I am dedicated to developing web applications that enhance user experience and engagement. Check out my portfolio [here](#).

PROFESSIONAL EXPERIENCES

Front-End Developer

Dec. 2020 – Aug. 2022

MCI (Mobile Telecommunication Company of Iran) - Tehran

- Designed and built a web dashboard to monitor over 5000 data plans for inter-organizational usage with React, Redux, Sass, Node.js, and MongoDB. View a simulation of the project's functionality [here](#)
- Improved the performance and scalability of 6+ web pages through code optimization, lazy loading and caching, resulting in an average of 15% faster page load speeds and a 10% decrease in bounce rate
- Developed a user-friendly and responsive web application to access the perks such as staff cafeteria and parking used by company employees with React, Redux, and MUI
- Contributed to the development of company's mobile app using React native and React Native MUI
- Implemented custom hooks, context API, and code-splitting techniques to enhance the reusability of existing code
- Streamlined overly complex code while preserving all functionalities to increase the user experience and engagement
- Implemented unit tests for React based projects using Jest, Mocha, Chai and React Testing Library to ensure the quality

Digital Services Analyst

Jun. 2016 – Nov. 2020

MCI (Mobile Telecommunication Company of Iran) - Tehran

- Coordinated the communication between development, IT, and marketing teams to successfully launch a new application called "Ewano"
- Decreased customer support requests by 10% through proactive maintenance of technology solutions and endpoints
- Contributed in UAT to test features of the company's mobile app in collaboration with development team and end-users to identify key business scenarios, resulting in an on-schedule and within-budget successful launch
- Led a team of five to plan and implement a new infrastructure for BYO plans, documented all processes and lessons learned over a period of 1.5+ years
- Worked closely with software engineers and designers to develop a tool for ticketing, request management, and product procurement
- Contributed to the success of 10+ product designs by providing mentorship and knowledge sharing to team members, and effectively collaborating with cross-functional teams
- Supported the implementation and maintenance of digital analytics tools (Google Analytics, Google Tag Manager) for the company's mobile application
